# Product Specification Sheet

## CONNECT – Gateway Unit

The CONNECT – Gateway Unit an essential piece of kit for the El-Björn CONNECT service. This device receives all performance data from El-Björn machines and transmits them to our El-Björn online remote monitoring platform, essentially it is the gateway between your equipment and your online portal. Constructed from durable, corrosion-resistant galvanised steel, Built to BS EN (IEC) 60439-4 standards, including heavy-duty stainless steel hinges and a secure padlock latch to prevent unauthorised access and unwanted unit downtime.

**Application**
Exclusively for use with our El-Bjorn Connect Temporary BMS system as part of a remotely monitored package, incorporating LoRaWAN communication allowing for use in areas such as deep basements with no mobile internet signal. Designed for use in arduous environments such as construction sites, industrial areas, and event spaces.

**Available for short and long term hire.**
