

Product Specification Sheet

60kVA Stage V Generator

The HRFW-60 is one of our medium sized Stage V Diesel Generator, producing a total power output of 59kVA, fitted with 1 x 16A 230V 2P+E, 3 x 32A 400V 3P+N+E, 1 x 63a 400V 3P+N+E sockets and a 216ltr internal bunded fuel tank for short term power generation (recommended to be used with additional bunded fuel tank for continuous use). Our Stage V Diesel Generators have been specifically designed to be compliant with EU Regulation 2016/1628/CE. Using a sophisticated built in exhaust treatment system, these generators clean the fumes expelled by the engine before they are released into the atmosphere. This process provides a reduction of up to 90% of environmentally hazardous gases and particles compared to previous technology. This generator is perfectly suited as a temporary power source for medium sized projects on construction sites, temporary work spaces, industrial areas and events venues with access to outside space.
